

# How can we link an event registration form to a component screen on the portal?

Updated Jul 14, 2021

As of July 12, 2021, this "Learn Veracross" site has been deprecated. It will remain live at least through October 1, 2021, but will no longer be updated. Q&A articles are only visible to authenticated users in the Veracross Community; please speak with your implementation or account manager for additional information.

You can add any link to a button, icon link, or notification link component in a portal, and adding a link to an online event registration form is no different. To do this:

1. Copy the URL of the event form.
2. Paste it into the URL field of a button, icon, or notification link on the component screen

Please note these individuals will not automatically be logged into the event registration forms; they will be prompted to log in.
