

How do I prevent access to group distribution lists?

Updated Jul 15, 2021

As of July 12, 2021, this "Learn Veracross" site has been deprecated. It will remain live at least through October 1, 2021, but will no longer be updated. Q&A articles are only visible to authenticated users in the Veracross Community; please speak with your implementation or account manager for additional information.

Add the "Deny Access to Distribution Lists" system profile code to any person record who should not be using them. This profile code prevents access to any distribution list including class and student-specific distribution lists typically used by faculty members. This is not something that is maintained by the system and you will need to be add and remove per record manually.
