

Can a portal be configured for both Future Parents and Future Students to use?

Updated Jul 14, 2021

As of July 12, 2021, this "Learn Veracross" site has been deprecated. It will remain live at least through October 1, 2021, but will no longer be updated. Q&A articles are only visible to authenticated users in the Veracross Community; please speak with your implementation or account manager for additional information.

Occasionally, schools may want to convert an existing future parent portal to combine future parents and future students in a "Transition" type portal intended for everyone transitioning into attending their school. In order to do this, please reach out to your account manager to set this up for you.

Note: if you are interested in adding Future Students to an existing Future Parent portal, then there are many components and system links that won't work for Future Students because it is a version of a Parent portal and those pages are configured to only work for parents.
