

Where/how can we store Social Security Numbers in Axiom?

Updated Jul 13, 2021

As of July 12, 2021, this "Learn Veracross" site has been deprecated. It will remain live at least through October 1, 2021, but will no longer be updated. Q&A articles are only visible to authenticated users in the Veracross Community; please speak with your Implementation or Account Manager for additional information.

Veracross does not support storage of social security numbers (SSNs) in any field for any purpose.

Veracross's number one priority is the security of customer data, as such we need to carefully balance what fields are available in the application that add value for customers with risk. Since SSN's are typically a special category of PII which have additional security and privacy implications Veracross has chosen to not support this field to reduce risk for customers in the event of a data breach. This risk based approach is also common across other EdTech vendors.
