

# What does the User\_Account\_Admin security role provide access to?

Updated Jul 13, 2021

As of July 12, 2021, this "Learn Veracross" site has been deprecated. It will remain live at least through October 1, 2021, but will no longer be updated. Q&A articles are only visible to authenticated users in the Veracross Community; please speak with your Implementation or Account Manager for additional information.

The User\_Account\_Admin security role allows a user to add/remove all security roles, except SysAdmin\_1 or SysAdmin\_2, for all users including themselves. This role also allows a user to:

- assign/remove Google accounts
- convert a user account to a Solicitor account
- send VC Welcome emails
- create workspaces
- create/update user and portal accounts/access

You can learn more about other security roles in the [Security Role Overview](#) article.
